Career Objective

Computer Science and Engineering student graduating in 2027 with hands-on experience in Python, machine learning, deep learning, and computer vision through internship and academic projects. Seeking an AI/ML internship to apply skills in data preprocessing, model development, and evaluation to real-world problems.

Education

Punjabi University, Patiala **2023 – 2027**
Bachelor of Technology in Computer Science and Engineering *CGPA: 8.3/10*

Technical Skills

- **Programming Languages:** Python, SQL
- **Machine Learning & Deep Learning:** Classification, Data Preprocessing, Feature Engineering, Model Evaluation, CNN
- **AI/ML Libraries & Frameworks:** TensorFlow, Keras, Scikit-learn, OpenCV, YOLOv8
- **Data Processing:** Pandas, Numpy
- **Tools:** Git, GitHub
- **Core Strengths:** Analytical Thinking, Problem-Solving, Logical Reasoning

Relevant Coursework

Data Structures and Algorithms (DSA) | Object-Oriented Programming (OOP) | Database Management Systems (DBMS)| Operating Systems (OS) | Computer Networks (CN) | Machine Learning | Deep Learning | Artificial Intelligence

Internship

Punjab AI Excellence **May 2025 – August 2025**
AI/ML Intern *Ferozepur, Punjab*

- Developed a deep learning–based Plant Disease Detection System using Python, OpenCV, TensorFlow/PyTorch, Pandas, and NumPy for image-based disease classification and early crop disease diagnosis.
- Performed image preprocessing, data augmentation, feature extraction, and model training to improve classification performance.
- Evaluated model performance on 17400 images, achieving 84% accuracy.
- Documented the complete project lifecycle in a comprehensive Project Report.
- Open-sourced the project on GitHub for reproducibility and collaboration.

Projects

Plant Disease Detection using Deep Learning | *Python — Tensorflow — OpenCV* **June 2025**

- Engineered an AI-powered solution to identify plant disease from leaf images using convolution Neural Networks.
- Built a complete image processing pipeline involving preprocessing, augmentation, and feature extraction.
- Trained and evaluated the model using classification metrics, including accuracy, precision, recall, F1-score, and a confusion matrix.

Crowd Detection Model| *Python — OpenCV — YOLO — Computer Vision* **April 2026**

- Designed an intelligent computer vision system capable of detecting and counting people in real time.
- Leveraged the YOLOv8 object detection framework to deliver fast and accurate crowd analysis.
- Applied object detection algorithms to improve detection accuracy.
- Demonstrated the system for public safety and surveillance applications.

Achievements

- Solved 300+ Data Structures and Algorithms (DSA) problems on coding platforms.
- Achieved Grade A+ during AI/ML internship/training at Punjab AI Excellence.
- Built 5+ AI/ML projects involving Machine Learning, Deep Learning, and Computer Vision.

Certifications

- Microsoft Certified: SQL AI Developer Associate
- Simplilearn: Introduction to AI
- Punjab AI Excellence: Data Science Intern
- Electronics ICT Academy IIT Roorkee : Foundations of AI and Large Language Models
